LANGUAGES

Portuguese - Native Language

English - Advanced

German - Advanced

SCHOLARSHIPS

09/2015 - 03/2016
I lived in Germany for a year as a student of DAAD and CAPES, part of a Brazilian government program called "Science without borders", where I learned German, studied computer science at Ulm Universität, and even worked at a large German technology company

EDUCATION

02/2019 - 12/2020
Universidade Estácio de Sá, Rio de Janeiro, Brazil
Bachelor of Information System.
Undergraduate thesis (Grade 10): Development of an order management system for on-demand food establishments

09/2015 - 03/2016
Universität Ulm, Ulm, Germany
Computer Science (Exchange Semester)
As an exchange student, I had the opportunity to study for a semester at the University of Ulm. There I was able to discover and learn some different subjects from the traditional grid of the computer science course in Brazil like Bioinformatics for example.

02/2013 - 11/2018
CEFET, Rio de Janeiro, Brazil
Bachelor of Computer Science
At CEFET/RJ I had the opportunity to engage myself with research projects on graph problems and Movie rating using text of subtitles analysis which enabled me, into a laboratory, to study and solve operational questions. It also gave me the opportunity to work with a published professor as my supervisor.

- The article developed as an approach to classify movies based on their subtitles was accepted at the sixth Brazilian Workshop on Social Network Analysis and Mining (BraSNAM 2017) which occurred in São Paulo, Brazil.

01/2010 - 01/2013
Federal Institute of Rio de Janeiro, Brazil
High School

PRACTICAL EXPERIENCE

11/2021 - Now
Stylight (ProSieben Group), Munich, Germany
"Software Engineer"

- Responsible for the main product of the company, acting as a Front-end developer for the public-facing website with millions of access daily.

- In the first week, I won an internal contest called "Open Friday", where we can show ideas for the company. In my project, I did a refactoring of our main product, improving its accessibility for disabled people and creating awareness of this important topic inside the company.

12/2020 - 11/2021
IBM, Rio de Janeiro, Brazil
"Front-End Developer"

- I acted as the main Front-End developer, responsible for bringing mobile-first, pixel-perfect, and JS culture to the company.

- Responsible for the entire Front-End of an internal project that aims to transform a mainframe software with over 30 years of existence into a new web application, with React Js, delivering a user-friendly application. The project is already running on production environment.

- I engaged myself in mentoring classes sharing my knowledge with subjects as Front-End, React, Carbon Design System, Github, and Career.

HOBBIES

GAMMING • TRAVELLING • SOCCER

VIDEO MAKING • SINGING • PLAYING

12/2018 - 12/2020

Infoglobo, Rio de Janeiro, Brazil

Infoglobo is a company belonging to Globo group founded in 1925. Currently, it operates in the publication of the main newspapers and magazines of the brand and their respective websites, and at the moment it is the second-largest newspaper company in Brazil.

"Full-Stack Developer"

- Responsible for new features and maintenance for all the client purchase flow, as the product's showcase, user web shopping experience, and implementations of some marketing strategies.
- Responsible for the development of the management system ⌐CMS⌐, which was built to create, edit, and integrate all the product's showcases into one single content.
- I interact a lot in decision making, I help the whole team sharing knowledge and I have great participation in the studies and systems architectures.
- The main skills and technologies used: Javascript, React Js, React-admin, Node Js, GraphQL, HTML, SASS, SCRUM, Kanban.

06/2017 - 12/2018

IBM, Rio de Janeiro, Brazil

"Web Development Intern"

- Focused on developing applications for IBM Global Financing (IGF) teams from Canada and Atlanta, like financial reports and contract generators. Mostly they were both back and front end web applications.
- I interacted a lot with clients doing the requirements gathering and developing the best solutions in the time range requested.
- I engaged myself in the fomentation and creation of internal and external events focused on the technological community.
- The main skills and technologies used: Communication, team work, multicultural interaction, use of other languages, SCRUM, Kanban, JS, Vue.js, Python, SQL.

02/2017 - 06/2017

Infoglobo, Rio de Janeiro, Brazil

⌐Web Development Intern⌐

- Responsible for the development of new features, improvements, and maintenance mainly of the O Globo (https://oglobo.globo.com/) and Extra (https://extra.globo.com/) websites.
- Responsible for the development proactive of a spreadsheet used to calculate the sprint velocity and some other metrics. This spreadsheet was adopted for the other teams and still in use nowadays.

03/2016 - 07/2016

Bosch, Boxberg, Germany

During my exchange period in Germany, I had the opportunity to start my IT career at this technology giant.

"IT Intern"

- I worked using mainly the German language
- I was responsible for testing and validating the implementation of an internal control and management software
- I've also managed, setup and updated data sheets for my managers
- I developed, as my initiative, a solution for managing lunch orders for employees and customers, which generated an internal optimization and facilitated the whole food order process. It was so well accepted by everyone that still in use in the company until today (2022)
